

## ASP.NET INTERVIEW QUESTIONS

- Q1)What is a Cookie?
- Q2)What are the primary built-in objects in Asp.net?
- Q3) What is aPostBack?
- Q4)What is a round trip?
- Q5)What are the types of cookies in Asp.net?
- Q6)Which is the father class of the Web server control?
- Q7)What is the change between Custom Control and User Control?
- Q8)How can you classify that the Page isPostBack?
- Q9) What are Authentication and Authorization?
- Q10)What are the types of Authentication?
- Q11)What are the various ways to send data across pages in Asp.net?
- Q12)Where is the ViewState information saved?
- Q13)What is the default timeout for a cookie?
- Q14)What is the change between HTML and Web server controls?
- Q15)What is the change between Server-side scripting and Client-side scripting?
- Q16)How do you create a permanent cookie?
- Q17)Which method do you access to redirect the user to another page without performing a round trip to the client?
- Q18)What tag do you access to add a hyperlink column to the DataGrid?
- Q19)How many languages .NET is supporting now?
- Q20) What is smart navigation?
- Q21)How do you verify the controls in an ASP .NET page?
- Q22)How do you turn off cookies for one page in the site?
- Q23)What are the event handlers that can be combined in the Global.asax file?
- Q24)What Asp.net objects encapsulate the state of the customer and the browser?
- Q25)What are the categories of validation controls in Asp.net?

- Q26) Which namespace is wanted to implement debug and trace?
- Q27) In which activities are the controls fully loaded?
- Q28) What is the use of @ Register directives?
- Q29) Define RequiredFieldValidator?
- Q30) What are the various types of Session state management options available with ASP.NET?
- Q31) How can you show all validation messages in one control?
- Q32) What is the change between a Label control and a Literal control?
- Q34) What is the function of Custom Validator?
- Q35) What is Role-based security?
- Q36) Can we disable ViewState, If, yes how?
- Q37) Can you give a model of what might be best suited to place in the Application\_Start and Session\_Start subroutines?
- Q38) What common class do all Web Forms inherit from?
- Q39) What is a Literal Control?
- Q40) What is Remoting?
- Q41) What's the use of "GLOBAL.ASAX" file?
- Q42) Explain the term ASP.Net?
- Q43) Why do we use Response.Write()?
- Q44) When does ViewState become obtainable?
- Q45) How is Server.Transfer different from Response.Redirect?
- Q46) How are Web Forms retrieved?
- Q47) Are there validators provided with ASP.NET?
- Q48) How do you make sure that values in dissimilar controls matched?
- Q49) Explain ViewState?
- Q50) Once page postback is achieved, where is the viewstate saved?
- Q51) For what time the articles in ViewState usually exist?
- Q52) Explain session preferences for state management of ASP.NET?

- Q53)How do you add event handler?
- Q54)Explain caching?
- Q55)Name various categories of caching?
- Q56)What type of caching is used to cache some section of page?
- Q57)Can you run web application with no use of file called 'web.Config'?
- Q58)Can you build web application using webforms in addition to MVC?
- Q59)Can code files in various languages be added in folder named 'App\_Code'?
- Q60)Explain Protected Configuration?
- Q61)What sources are accessible with ASP.NET?
- Q62)Explain properties of a DataSet class?
- Q63)How can you run validations or authentications in aspx page?
- Q64)Name Global.asax file's event handlers?
- Q65)Is there a protocol for calling services from Web?
- Q66)Are manifold web config records possible for the location of asp.net?
- Q67)How is web config different from machine config? Explain.
- Q68)What is role based access?
- Q69)Explain Cross Page Postback?
- Q70)Can themes be applied to applications of asp.net?
- Q71)What is ASP.Net's RedirectPermanent?
- Q72)Explain MVC?
- Q1)How does passport authentication work?
- Q73)Name some advantages with Passport authentication?
- Q74)Name some Security Controls in asp.net?
- Q75)What is CaseSensitive property used for?
- Q76)What is the name of the event when pages are completely loaded?
- Q77)How is boxing different from unboxing?
- Q78)How is strong typing different from weak typing?

Q79)How can you check if validation was a success?

Q80)What templates are present in Repeater control?

Q81)What are ASP.NET's built-in or permanent objects?

Q82)What do you know about web.config file's appSettings unit?

Q83)How is HtmlInputCheckBox control different from HtmlInputRadioButton control?

Q84)Name namespaces that are required for creation of localized application?

Q85)Name different kinds of ASP.NET cookies?

Q86)What file extension is used for web service?

Q87)Name ADO.NET components?

Q88)How is ExecuteScalar different from ExecuteNonQuery?

Q89)Name data types maintained by RangeValidator control?
